Architecture, Interior Design, Landscaping, Master planning, FF&E, MEP and structural works

COMPANY PROFILE

A-cero is an architecture firm founded in 1996, vowed to the integral development of architectural, interior design and urban planning projects.

The studio has a team of more than fifty specialized professionals, led by Joaquín Torres, in two main headquarters in Spain and foreign project offices in Dubai, Sao Paulo and, recently, in Ho Chi Minh City.

The practice has evolved in parallel to its clients demands, building a large portfolio comprising residential estates, resorts, office buildings, mixed-use high-rises, corporate and interior design.

Our working method is based on a detailed analysis of the clients needs and the projects program. The result is examined in all its dimensions in order to find every potential problem, all the possible solutions are studied and all the material possibilities for the new building analyzed during the design stage. The concept ideas are kept from the beginning to the end, as a conducting thread for the design process, in order to achieve the best possible results
