对于这栋住宅，设计师最初的想法是要将它与周围的自然环境融合在一起，从而为欣赏周边湖泊以及绿化带的美景提供良好的视野。整栋住宅由两个矩形结构组成，清晰明朗的线条、高质量的建材以及独有的建筑品质是这栋住宅的主要特征，宽敞的游廊和凉亭则赋予了立面极具个性的特征。

住宅占地面积为800平方米，主入口的设计与建筑用地原有的和缓的坡道相契合。步入室内，你将先后经过门厅、厨房、餐厅、办公室、食品贮藏室和七间卧室，且每间卧室都带有独立卫浴空间、两间更衣室和一个露台。在住宅后半部分，透过大面积的落地窗可看到朝花园开放的大起居室。花园内设置有泳池，可边享受惬意的私密生活，边欣赏周围的自然景观。而起居室就包裹在这由湖泊、飞鸟和大片树林所绘制的无边的自然景色中。

室外的人行道和中央景观带与覆有本地植被的绿化带相容，能够有效应对当地气候环境的变化。簇拥在围栏沿线的树木和灌木丛完美地模糊了私人空间与公共空间之间的界线。

The initial idea of this project is to integrate the house in the natural environment of the residential area in which it is. In that way, the house looks to the fantastic views of lakes and green extensions that spread over the common areas of the estate.

The structure of the house is based on game of two rectangular volumes. They are solving with clean finishes, good materials and exclusive qualities. The verandas and the pergolas, elements as volumetric as the housing, give personality to the facade. The housing, of 800m<sup>2</sup> of surface, develops in a height. The principal access adapts itself to an area of average slope. Inside the following stays are located: foyer, kitchen, dining room, office, larder, seven bedrooms (with his respective baths, two dressing-rooms and a patio). In the later part, across big large windows, there is lounge that is opened for the garden, the swimming pool and for the natural scenery that offers the urban development. It surrounds itself with a landscaping realized with attractive interventions composed by lakes, birds and a big arboreal extension.

In the exterior the pedestrian ways and the central landscaped area incorporate a vegetation of indigenous character, resistant to the climate of the area. The stockades of every plot and the trees and shrubs planted along the same ones, they delimit perfectly the transit between the private ownership and the community one.
