# Gente Goings-on

**Ai Weiwei** ha sido finalmente liberado bajo fianza, después de pasar casi doce semanas detenido —de las cuales la mitad en paradero desconocido—, según las autoridades chinas por ser sospechoso de delitos económicos. El artista y disidente chino, que padece diabetes e hipertensión, ha podido volver a casa debido, según un breve comunicado oficial, a que «ha manifestado repetidamente que está dispuesto a pagar los impuestos evadidos».

**Joaquín Torres** ha llegado a un acuerdo con Citroën España para crear una serie especial del modelo DS3, limitada a 50 unidades, y firmada por el arquitecto, quien diseñará un techo individualizado y específico para cada comprador. Conocido como 'el arquitecto de los famosos', Torres ha proyectado desde su estudio A-cero las casas de **Cristiano Ronaldo**, **Fernando Torres** o **Javier Bardem** y **Penélope Cruz**, entre otros.

**Zaha Hadid** acaba de sufrir otro varapalo judicial en su proyecto para la biblioteca de la Universidad de Sevilla, denunciado hace dos años por las asociaciones de vecinos de la zona por considerarlo perjudicial para el Prado de San Sebastián en el que se inserta. Paralizadas las

*Ai Weiwei has finally been released on bail, after having spent almost twelve weeks under arrest – half of which in a secret location –, on economic crime charges according to Chinese authorities. The Chinese artist and dissident, which suffers from diabetes and hypertension, has been able to return home because, in the terms stated in an official report, he has "repeatedly manifested his willingness to repay the evaded taxes".*

*Joaquín Torres has reached an agreement with Citroën Spain to create a special series of the DS3 model, limited to 50 units, and signed by the architect, who will design a personalized roof for each buyer. Known as 'the architect of celebrities', his studio A-cero has designed the homes of **Cristian Ronaldo**, **Fernando Torres** or **Javier Bardem** and **Penélope Cruz**, among others.*

*The construction works of **Zaha Hadid's** library of the University of Sevilla have just been halted by the courts, which have in this way considered the complaints of the neighborhood associations, which claimed that the construction of the building damaged the Prado de San Sebastián, where it is located.*

obras desde 2009 por orden del Tribunal Superior de Justicia de Andalucía, ahora el Tribunal Supremo ha decidido que el lugar en el que se ubicará la biblioteca no es el adecuado, pues supone la eliminación de parte de la zona verde.

**Santiago Fajardo**, autor del proyecto del Auditorio Arteria Al Andalus de Sevilla, ha demandado a la Sociedad General de Autores y Editores (SGAE) por vulneración de sus derechos de propiedad intelectual y por impago de honorarios. Fajardo, que dimitió recientemente como director de obra del edificio, ha explicado que ha demandado de manera directa al presidente de la institución, **Teddy Bautista**, por intromisión en el derecho al honor, por haberle acusado éste de 'negligente' al abandonar el proyecto. El arquitecto defiende que se vio obligado a dimitir a causa de las dificultades en el pago de las facturas y de la opacidad de las cuentas, a las que no se le ha permitido acceder pese a ser el responsable civil y penal del resultado final de la obra.

**Santiago Calatrava**, junto a su equipo técnico valenciano, una promotora y una subcontrata, ha sido condenado a abonar 3,5 millones de euros por el derrumbe de un forjado en el

*Interrupted since 2009 by order of the regional courts, now the Supreme Court has decided that the site assigned for the new library is not the most adequate, because part of the green areas would have to be eliminated.*

***Santiago Fajardo**, the author of the project for the Arteria Al Andalus Auditorium of Sevilla, has pressed charges against the SGAE (collecting society for authors in Spain) for violation of his intellectual property rights and for non-payment of honorariums. Fajardo, who recently resigned as project director, has explained that he has also pressed charges against the institution's director, **Teddy Bautista**, for interference in his right to honor when Bautista accused of him 'negligence' when he abandoned the project. The architect claims that he was forced to resign because of the difficulties in the payment of invoices and the lack of transparency of the accounts, which he has not been allowed to access in spite of holding civil and criminal liability for the final result of the work.*

***Santiago Calatrava**, along with his technical team in Valencia, a developer and a sub-contractor, has been condemned to pay 3.5*

million euros for the collapse of a slab of the Congress Center of Oviedo, after the trial that took place in April, in which the architect failed to appear. The collapse took place during the construction of the building in August 2006, and left three workers with minor injuries. The sentence states that the collapse of the structure was caused by "the failure of the shoring supporting the structure", because "the studs were not properly braced".

**Oscar Niemeyer** ocupa el primer puesto en el ranking de popularidad en Facebook de los estudios de arquitectura de todo el mundo, según ha publicado *ArchDaily*. El brasileño, que el pasado diciembre cumplió 103 años, cuenta con casi 250.000 amigos en la red social, y le siguen en la lista **Zaha Hadid**, con 234.000; **Renzo Piano** y **Santiago Calatrava**, ambos con cerca de 160.000. Por debajo de estos se encuentran **Tadao Ando** (60.000), **Peter Zumthor** (52.000), **Herzog & de Meuron** (37.000), y **Jean Nouvel** (35.000). Además de Calatrava, entre los veinte estudios que incluye la lista aparece sólo otro español: el coruñés **Joaquín Torres**, en el puesto decimotercero, con 20.000 amigos.

The sentence states that the collapse of the structure was caused by "the failure of the shoring supporting the structure", because "the studs were not properly braced".*

***Oscar Niemeyer** leads the ranking of the world's most popular architecture studios on Facebook, according to the architecture website ArchDaily. The Brazilian architect, who turned 103 this past December, has almost 250,000 friends in the social network, and is followed by **Zaha Hadid**, with 234,000; **Renzo Piano** and **Santiago Calatrava**, both with around 160,000. Further below on the list are **Tadao Ando** (60,000), **Peter Zumthor** (52,000), **Herzog & de Meuron** (37,000), and **Jean Nouvel** (35,000). Aside from Calatrava, among the twenty studios included in the ranking there is only one other Spaniard: the Galician **Joaquín Torres**, who comes in number thirteen, with 20,000 friends.*
