A-cero合伙人

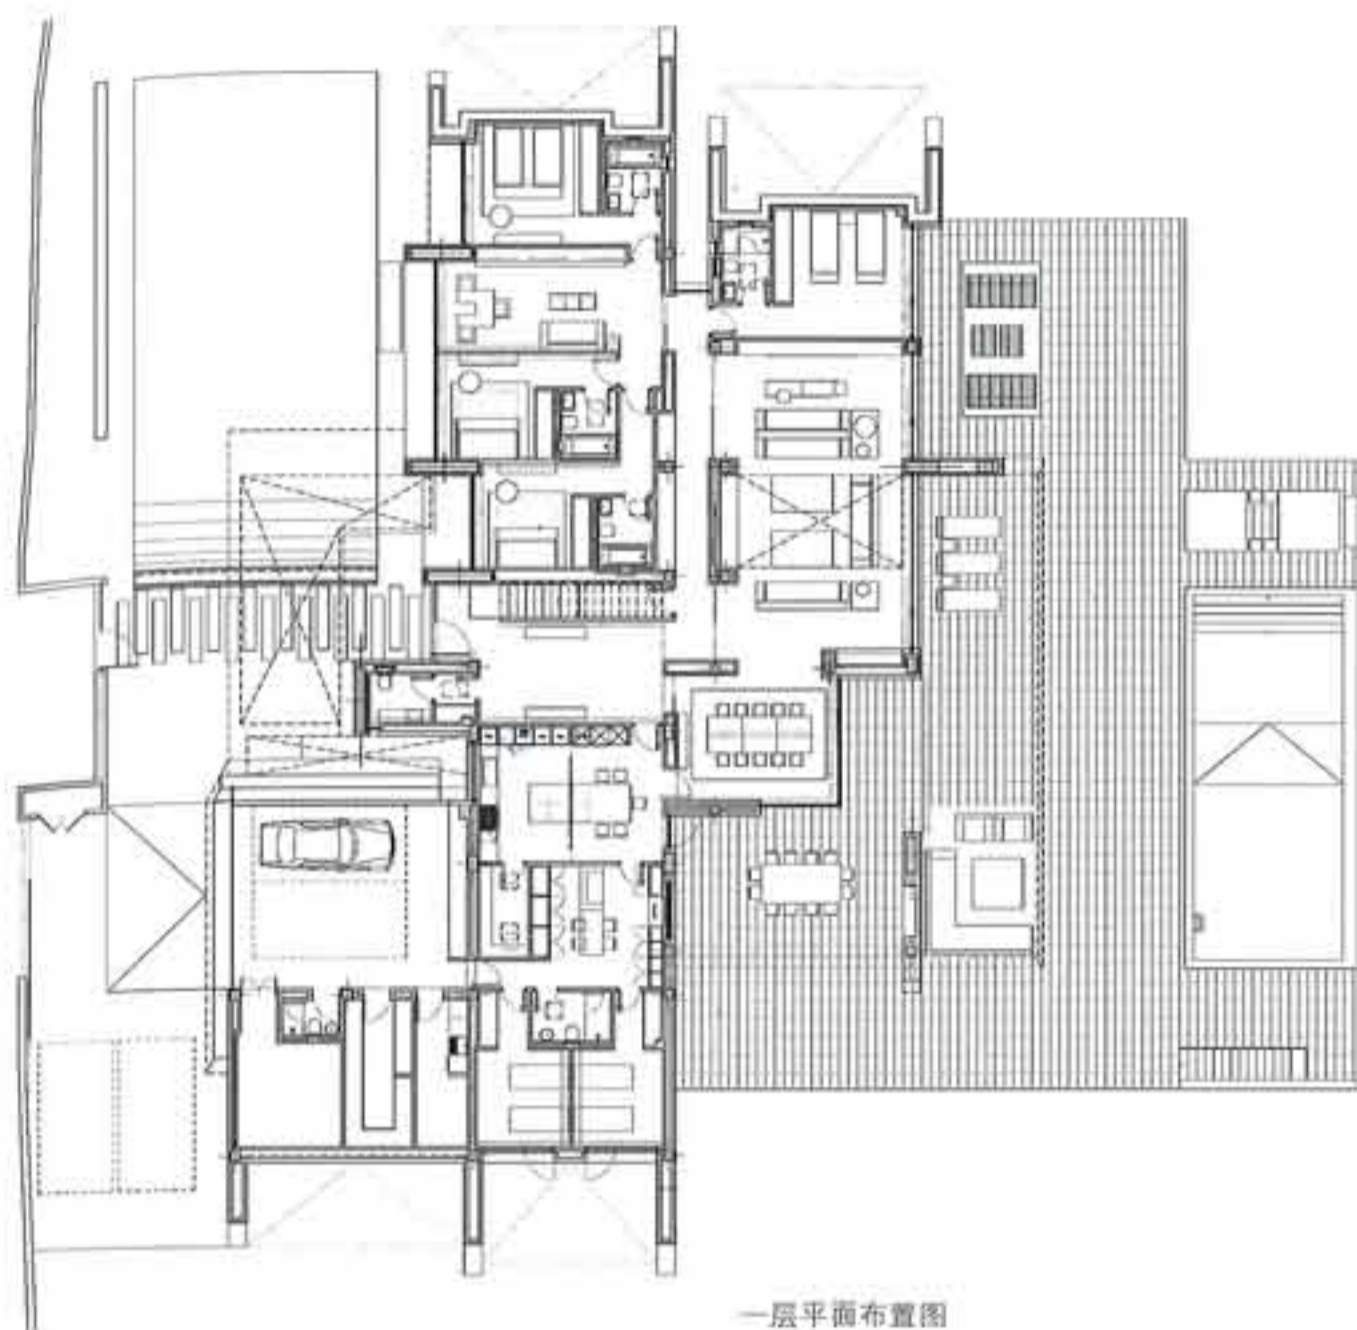

加的斯是西班牙西南部的一座滨海城市，西班牙人通常会在夏天来这里旅游度假，这栋独立式家庭住宅即是专为度假而打造的。在房屋装饰过程中，为了使室内空间色调更为明亮通透，设计师挑选了白色作为主设计元素，以此来打造一个轻松愉悦的氛围。在户外空间中，有一个占地90平方米的游泳池，更为屋主与朋友聚会或举办社交活动提供了一个宽阔的休闲场所。

建筑的结构恰似一个立方体，有上下两层。底层主要为公共空间：门厅、休闲室、用餐室、清洗室、厨房和服务区，每个空间都有独立的出入口通往室外。私人空间分布在上层，该层包括了所有卧室：主卧、客卧以及儿童房。室内的家具由A-cero设计，有一部分为经过喷漆处理的现代家具，白色和米黄色的木制家具是其中的主打。在个别空间中，为了打破白色在空间中的主导优势，设计师偶尔会使用黑木进行某些细节处理。此外，从某些装饰中也可以看出屋主独具个性的生活方式，比如Piet Hein灯具、娱乐室中放置的一系列椅子等。总的来说，靠海的城市，再加上舒适且实用的夏日居所，就可以等于一个完美假期了。

一层平面布置图

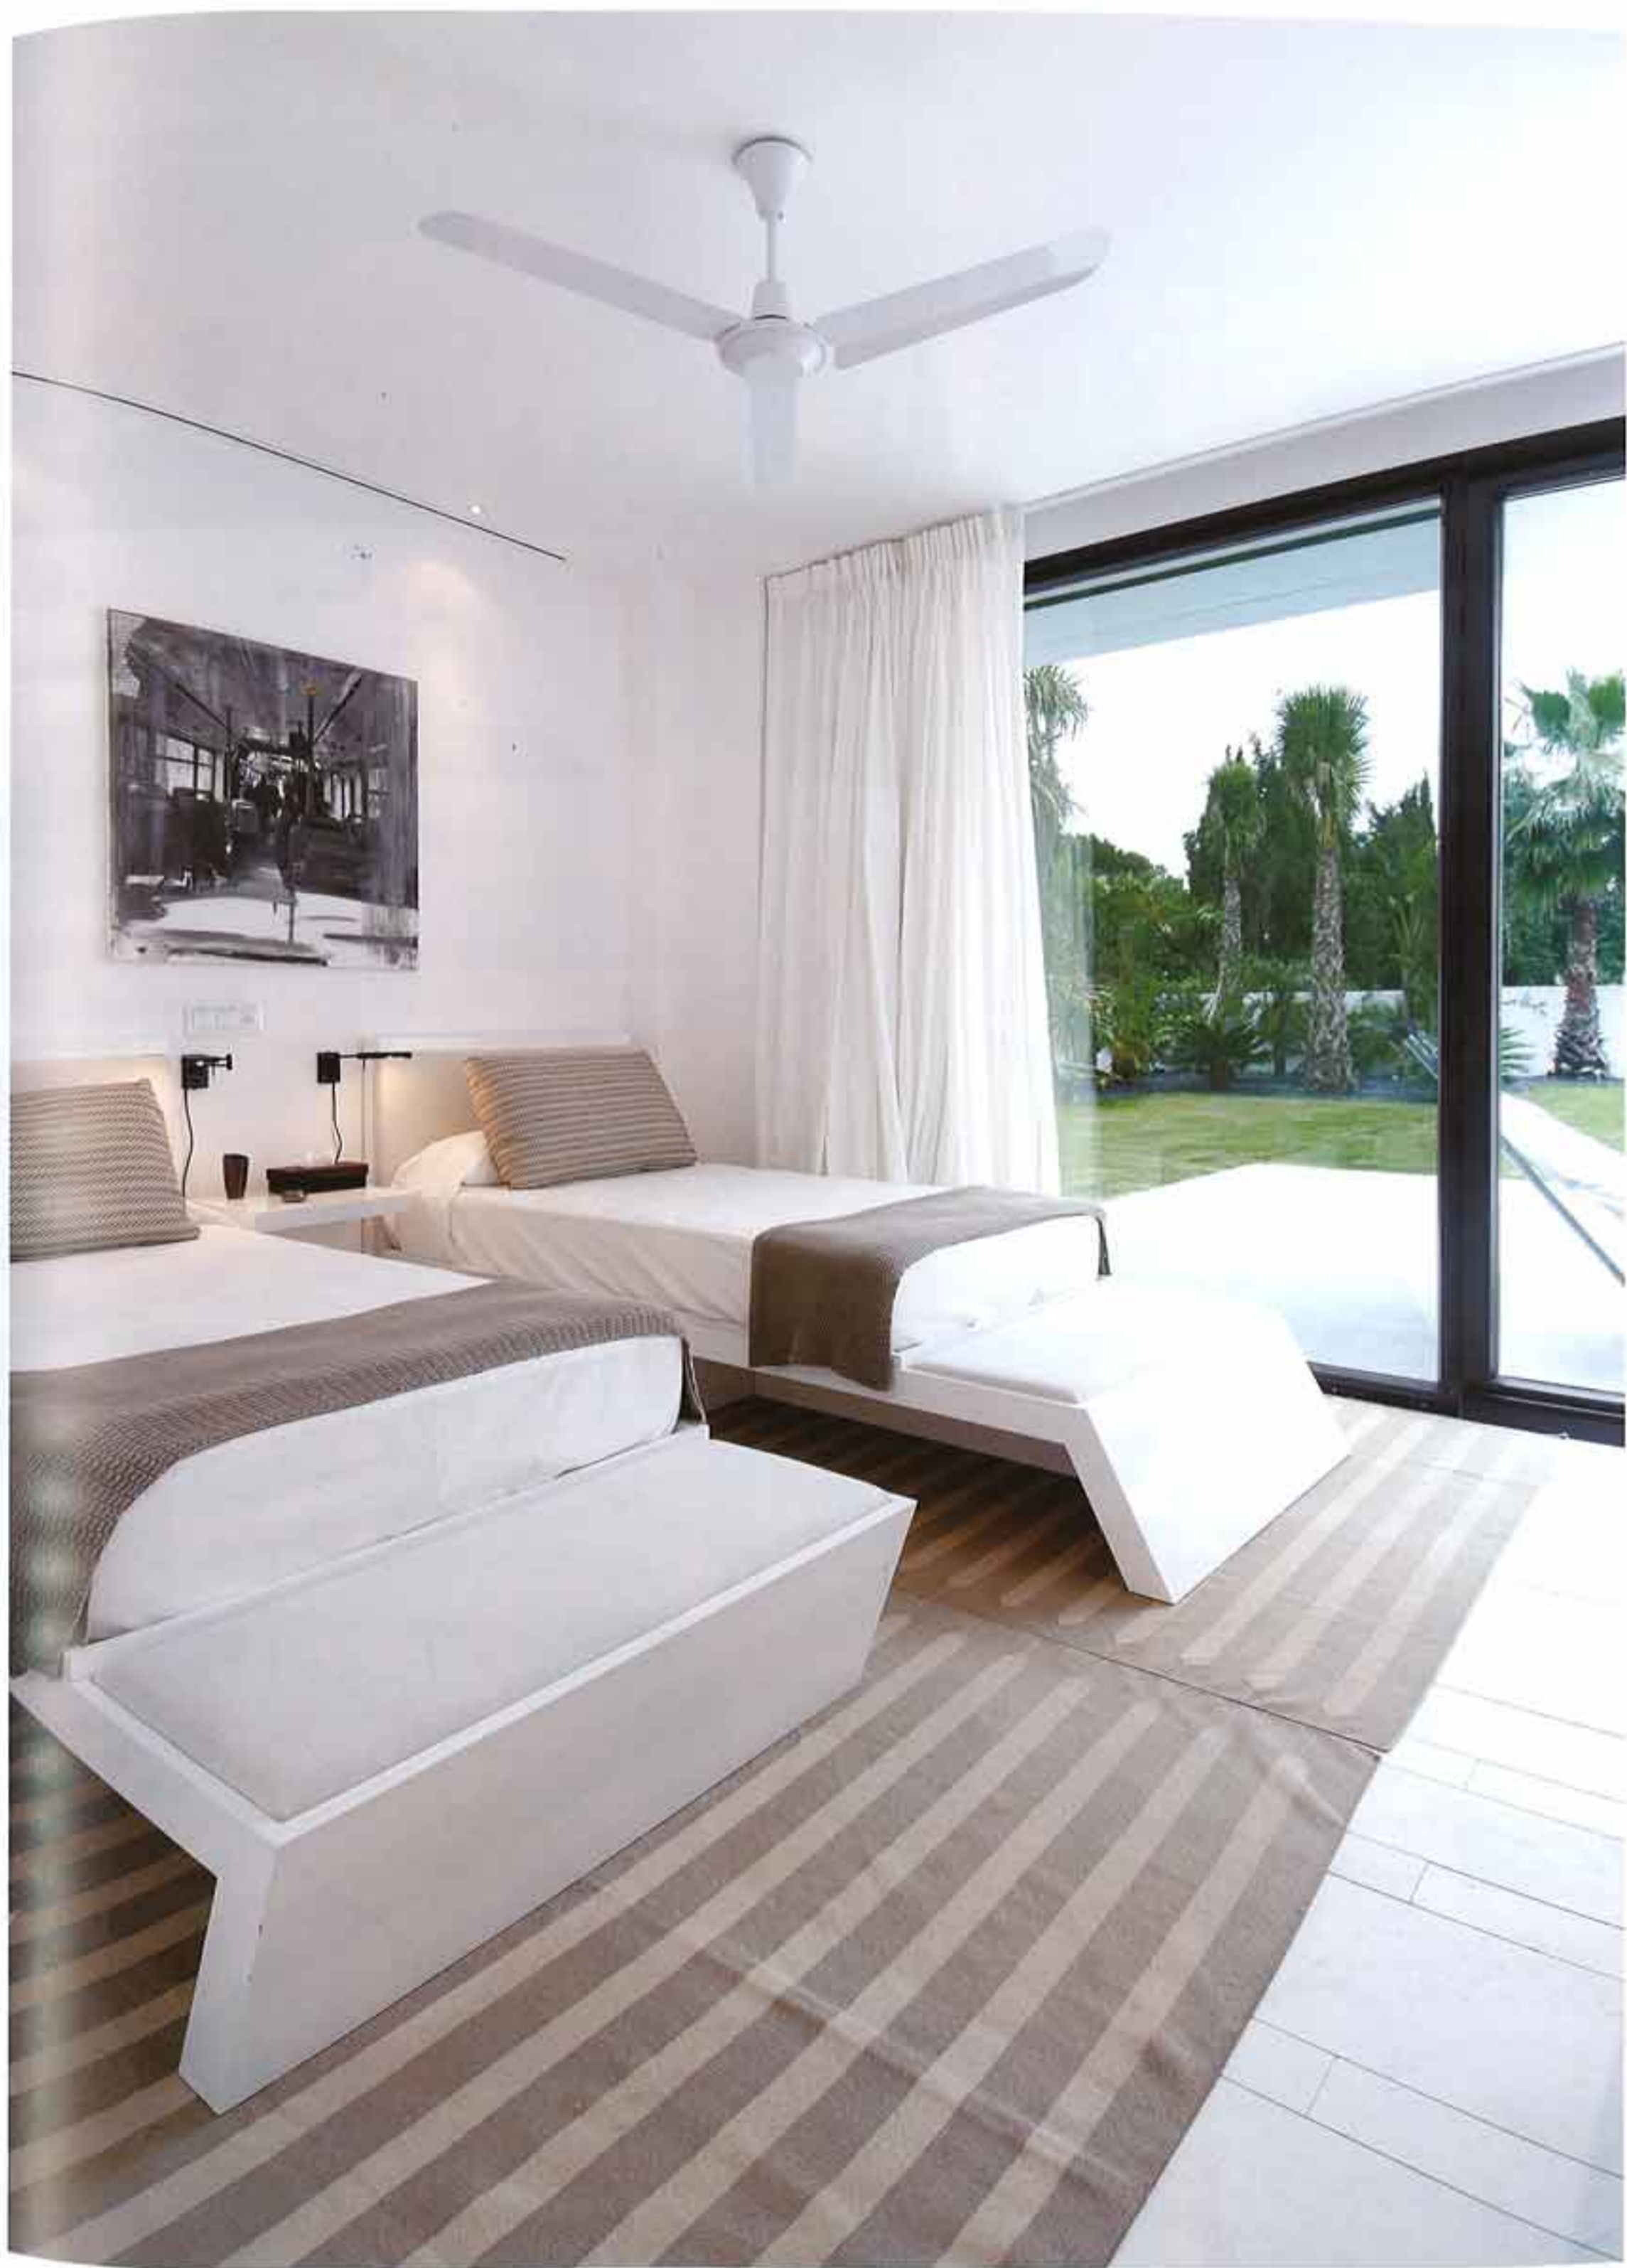

The A-cero architecture studio, managed by Mr. Torres, presents a new work: a single-family house situated in a tourist town of the Mediterranean coast. It has been built as a house for holidays.

A-cero has chosen the white colour as the main element in the house's decoration in order to provide clarity and luminosity to the interior areas.

Furthermore, white colour has been chosen because it creates a relaxation atmosphere according to the playful intentions of the owners. In the exterior areas you can find a 90m² swimming pool and wide recreation places in order to celebrate meetings and social events.

The house' s structure is a cubic volume. It has an area of almost 400 m² and it is distributed in two floors. The most public spaces are in the ground floor: lounge, dining room, hall and a cleaning room. The kitchen and service area are in this level too. All the rooms have access to the exterior areas. Private areas are in the highest level. In this floor are all the bedrooms (the principal one, the guests and child bedrooms).

The furniture, designed by A-cero, includes lacquered modern pieces. White and beige woods have a main role in the furniture. In some places there are some details of dark wood which break the predominant white colour. Owners have given to the house a personal style. They have included several pieces in the house' s decoration as a Piet Hein lamp or a chair set in the games room.

In conclusion, this is a comfortable and functional house for summer holidays where the white colour has the main role according to the typical architecture of the region where it is located.
