QUITLET

variations on a theme

In the hands of different designers, the same material can take on a variety of looks. Consider **Vondom's** furniture in rotation-molded polyethylene.

Hollowed shapes, evoking a nautilus shell in tribute to Neptune, characterize the seating, cocktail table, and stereo speaker of Eugeni Quitlet's Bum Bum collection. Estudi hac founder José Manuel Ferrero goes two-for-one with the triangles of Marquis, which stack to form a planter or a lamp. A-cero partners Rafael Llamazares and Joaquín Torres riff on the interplay between curves and angles in the Wing range of aerodynamic chairs, tables, and lamps, their forms embedded with remote-control color-changing LEDs. vondom.com.
